PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of commercial experience in architecting scalable web applications and micro-frontend ecosystems using **React**, **Next.js**, and **TypeScript**. Proven track record of boosting UI performance by 15% and streamlining cross-platform authorization. Expert in global state management (**Zustand**, **Redux**) and building accessible, secure, user-centric interfaces. Fluent in **English (C1)** and **Russian**, driving results in fast-paced cross-functional Agile teams.

EXPERIENCE

Frontend Developer

November 2025 – May 2026

Akatosphere

Moscow, RU

- Optimized platform-wide user authorization by reducing validation time to sub-2s, engineering a Unified Auth & SSO System for 6 core services using **TypeScript** and shared cookies.
- Automated complex bonus distributions across the entire user base by developing a scalable Referral & Reward Module integrated with **React** deep-link tracking.
- Streamlined client data workflows by building an interactive Customer Dashboard in **React** for real-time management of bonus balances and dynamic coupon generation.
- Maintained a 1.5s UI response time under peak loads of 10k concurrent requests by implementing frontend optimization, brute-force security, and GDPR compliance standards.

Frontend Developer

September 2025 – November 2025

Tivali Club

Moscow, RU

- Boosted application loading speed by 15% by engineering high-performance custom UI solutions to replace 30% of bloated third-party libraries in a **Next.js** environment.
- Accelerated feature delivery time by 25% by modernizing application architecture with **Zustand** global state management and strict data validation via **Zod**.
- Expanded international market reach by 40% and raised user engagement by 20% through localized interaction modules powered by **React** and multi-language support.

Frontend Developer

January 2025 – May 2025

Vision Core

Istanbul, TR

- Enhanced codebase maintainability and page rendering speed by 40% through a comprehensive core architecture refactoring using **React** best practices and **TypeScript**.
- Reduced UI code duplication by 40% by creating a reusable, ARIA-compliant component library driven by a custom useModal hook in **React**.
- Accelerated global accessibility and site load speed across mobile devices by developing responsive mobile-first layouts integrated with instant **i18next** localization rendering.

Frontend Developer

July 2024 – November 2024

Dara Solutions

Almaty, KZ

- Improved internal platform efficiency and operational speed by designing 5+ educational modules integrated with structured data flows via **RESTful APIs** and **React**.
- Boosted frontend application stability and reduced production downtime by identifying and resolving 30+ critical bugs within the core **React** and **Redux** codebase.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, SCSS

Frameworks & Libraries: React, Next.js, Node.js, Redux Toolkit, Zustand, jQuery, Zod, i18next

UI & Styling: Tailwind CSS, ShadCN, MaterialUI, Ant Design, Radix UI, Swiper, Formik

Databases & Backend: REST APIs, JSON, MongoDB, Sanity, Appwrite, Express

Tools, Bundlers & Testing: Git, Cursor, VS Code, Vite, Webpack, Postman, Jest, React Testing Library

Concepts & Architecture: Feature-Sliced Design (FSD), SSO/Auth Systems, Core Web Vitals, Mobile-First Layouts, Agile/Scrum
